

Use these two files and commands.

1. Start the portal UI

- File: index.html
- Command:

```
cd "c:\Users\zope1\OneDrive\Desktop\campaignportal\Study_2026\07.
Communication360\app"
python -m http.server 8000
```

- Open in browser:

```
http://127.0.0.1:8000/index.html
```

2. Start the campaign API backend

- File: campaign_api.py
- Command:

```
cd "c:\Users\zope1\OneDrive\Desktop\campaignportal\Study_2026\07.
Communication360\Wrapper"
python campaign_api.py
```

3. Stop the server

- Press:

```
Ctrl + C
```

in the terminal where the server is running.

If **python** does not work on your machine, use:

```
py -m http.server 8000
```

and

```
py campaign_api.py
```

4. Open the portal UI in your browser using the following URL:

```
http://127.0.0.1:8000/index.html
```
